§ 170.315(b)(10): Electronic Health Information Export

## Justification of RWT Testing Approach – CQMsolution

CQMsolution is a software application that "bolts-on" to EHR products. It is used in both ambulatory and inpatient care settings. In general, we chose to concentrate on the aspects of each criterion that would closely follow the actual activities of CQMsolution end users and also provide the most benefit for caregivers and patients. At a high level, these use cases include:

1) Capabilities that support comparison with industry-standard benchmarks and with prior/expected performance for CQM calculation and reporting, and

2) Providing the best possible support for MIPS participants in automated, streamlined end-to-end reporting.

3) Functionality that gives EHR users flexibility in choosing EHR vendors and migrating from one EHR to another, even in the middle of a quality reporting period,

## CQMsolution 23, 24, 25 (RWT) Real World Testing Plan 2025

Criteria	Care Setting	Measureme	ent Period	Date	Key Milestones
Clinical Quality Measures					
§ 170.315(c)(1)—record and export § 170.315(c)(2)—import and calculate	Ambulatory & Inpatient			Start test plan execution: January, 2025	Based on historical data, select the most popular eCQMs.
§ 170.315(c)(3)—report				February, 2025	The file should upload and be accepted by the HQR website without error.
		1/1/2025 -	5/31/2025	March, 2025	The file should upload and be accepted by MIPS without error.
				April, 2025	All populations of all measures should match.
				Complete test execution: May, 2025	Prepare reporting for RWT
Care Coordination					
§ 170.315(b)(10) Electronic Health Information export	Ambulatory & Inpatient			Start test plan execution:	 Available reporting programs are configurable per user according to license
3 170.015(b)(10) Electionic ricatar mormation export	Ambuatory & inpatient			May, 2025	Available reporting bygeneration are configurable per data according to increase
		3/1/2025 -	- 6/1/2025	May, 2025	QRDA I files are downloaded for only those patients contained within the report and are validated successfully
				June, 2025	Use Cypress to check validity of output file
				July, 2025	Export was created and completed successfully
				Complete test execution: August, 2025	Prepare RWT results report

	Associated Certification Criteria: § 170.315(c)(1) - Clinical quality measures (CQMs) — record and export § 170.315(c)(2) - Clinical quality measures (CQMs) — import and calculate § 170.315(c)(3) - Clinical quality measures (CQMs) — report					
	Measure Description: • Capture and record electronic clinical quality measure (eCQM) data in EHR (or trading partner's EHR) for calculating eCQMs. • Electronically create a data file for transmission of CQM data in accordance with the CMS QRDA Category I IG for inpatient measures as adopted in § 170.205(h)(3) and CMS QRDA Category III IG for ambulatory measures as adopted in § 170.205(k)(3).	calculation and output: 1) Run quality measure reports and display results on Dashboard to compare with industry-standard benchmarks and with prior/expected performance of the standard benchmarks and benchmarks				
	Metric Description: 1) 100 percent matching data elements in CQMsolution vs EHR. This will be confirmed by visual va • Demographics • Problems • Medications • Allergies 2) 100 percent matching calculation results in CQMsolution vs submission environment 3) 0 percent of files uploaded to submission environment result in errors	lidation of the following data:	Category I (QRD4 Material, Decem • 170.205(h)(3) 2 Category I; Hospi • 170.205(k)(3) 2 Category I; Hospi • 170.205(k)(3) 2 Category II; Eligi Updated certifica • § 170.315(c)(1) • § 170.315(c)(3) Health IT Module • 15.05.05.2713. 	Developer Info: DYNAMIC HEALTH IT, INC 320 Monticello Ave. New Orleans, LA 70121 504.309.9103 Care Setting: CQMsolution is used for eCQM submission in both ambulatory and inpatient environments, thus this test plan accounts for both care settings.	Product Info: Product Name: CQMsolution Product Version: 23, 24, 25 CHPL ID: (23) 15.05.05.2713.DH23.03.06.0.221229 (24) 15.05.05.2713.DH24.04.07.0.231024 (25) Pending	Methods Use to • Visual inspectio • Matching of ca	Demonstrate Inton and matching lculation results	· ·	
Test Step:	Testing Procedure:	Expected Outcomes:	Key Milestone Date:	Key Milestone:	: Outcome:	Comment(s)
1i	* Inpatient Setting Identify Trading Partner (TP) and coordinate with TP for calculating and reporting electronic clinical quality measures (eCQMs) using production data as described in this RWT plan.	Confirm Trading Partner     Confirm ability to calculate and report eCQMs     Confirm with TP that production data will be     used, whether in an actual live environment or a     copy of a live environment	Start test plan execution: January, 2025			

## CQMsolution 23, 24, 25 (RWT) Real World Testing Plan 2025

2i	Identify four EH (Eligible Hospital) eCQMs for RWT.	Based on historical data, select the most popular eCQMs.			
3i	Identify a one calendar quarter reporting period with adequate patient data for reporting.	Admins with sufficient familiarity with the hospital's clinical activities should be able to choose a period with an appropriate amount of quality data.			
4i	Capture and record clinical quality measure (CQM) data in Trading Partner's (TP) EHR. Since manual data entry for an adequate quantity of data would be onerous, we will use actual patient data. a. If TP is integrated with CQMsolution, CQMsolution will capture data through a SQL query, so that when a user runs a CQM report, CQMsolution pulls data directly from the TP's database. b. Alternative approach: Pull in data through QRDA I files in a .zip folder	Data ready for report generation			
5i	Correctly calculate numerator, denominator, exclusion and exception values for selected eCQMs.	The CQMsolution report should complete with no errors.			
6i	Spot-check 10 patients for each measure, ensuring that some are in the denominator only, some are in the numerator and denominator and, if possible, some are exclusions or exceptions.	Use Patient List to check which categories Initial Patient Population (IPP), Denominator (Den), Exclusions (Excl), Numerator (Num) or Exceptions (Excp) each patient falls into. For each spot-check patient, use the drill-down to confirm that the patient data in CQMsolution (encounters, codes, demographics) matches the patient data in the EHR and that the patient is correctly categorized in CQMsolution.			
<b>7</b> i	Upload the generated zip files containing the HQR_PI_IQR QRDA I files to the HQR website test environment.	The file should upload and be accepted by the HQR website without error.	February, 2025		
	* Ambulatory Setting				
1a	Identify Trading Partner (TP) and coordinate with TP for calculating and reporting electronic clinical quality measures (eCQMs) using production data as described in this RWT plan.	Confirm Trading Partner     Confirm ability to calculate and report eCQMs     Confirm with TP that production data will be used, whether in an actual live environment or a copy of a live environment			
2a	Identify six EP (Eligible Professional) eCQMs for RWT.	Based on historical data, select the most popular eCQMs.			
За	Identify a one calendar year reporting period with adequate patient data for reporting.	Admins with sufficient familiarity with the physician practice's clinical activities should be able to choose a period with an appropriate amount of quality data.			
4a	Capture and record clinical quality measure (CQM) data in Trading Partner's (TP) EHR. Since manual data entry for an adequate quantity of data would be onerous, we will use actual patient data. a. If TP is integrated with CQMsolution, CQMsolution will capture data through a SQL query, so that when a user runs a CQM report, CQMsolution pulls data directly from the TP's database. b. Alternative approach: Pull in data through QRDA I files in a .zip folder	Data ready for report generation.			
5а	Correctly calculate numerator, denominator, exclusion and exception values for selected eCQMs.	The CQMsolution report should complete with no errors.			
6a	Spot-check 10 patients for each measure, ensuring that some are in the denominator only, some are in the numerator and denominator and, if possible, some are exclusions or exceptions.	Use Patient List to check which categories Initial Patient Population (IPP), Denominator (Den), Exclusions (Excl), Numerator (Num) or Exceptions (Excp) each patient falls into. For each spot-check patient, use the drill-down to confirm that the patient data in CQMsolution (encounters, codes, demographics) matches the patient data in the EHR and that the patient is correctly categorized in CQMsolution.			
7a	Upload the generated MIPS QRDA III file to QPP.	The file should upload and be accepted by MIPS without error.	March, 2025		

8	Check the submission environment's measure calculation results and compare them to CQMsolution's calculation results. Both settings	All populations of all measures should match.	April, 2025		
9	Calculate and compile metrics	Prepare reporting for RWT	Complete test execution: May, 2025

<u>Table of</u> Contents	Associated Certification Criteria: § 170.315(b)(10) Electronic Health Information export								
	Measure Description: Export USCDIv1 clinical data for a population of patients for use in a different health information technology product or a third party system. This export can be used for many purposes, including data portability when a physician practice switches to a new EHR platform.	ustification: We chose to concentrate on the aspects of this criterion that would: L) demonstrate CQMsolution's ability to export batches of patient data in a straightforward fashion 2) facilitate interoperability by providing the exported data in the form of valid QRDA files that conform to the HL7 standards as described in the HL7 mplementation Guide for CDA Release 2: Quality Report Document Architecture, Category I.							
	Metric Description: 1) QRDA count matches actual patient count in database 2) 100% of spot-checked QRDAs pass Cypress	I							
	Developer Info: DYNAMIC HEALTH IT, INC 320 Monticello Ave. New Orleans, LA 70121 504.309.9103	Product Info: Product Name: CQMsolution Product Version: 23, 24, 25	Methods Use to Demonstrate Interoperability: 1) Visual validation/counting 2) Test output file with Cypress to ensure correct format/contents.						
	Care Setting: Ambulatory/Inpatient The functionality for the criteria is the same whether the care setting is ambulatory or inpatient.	(23) 15.05.05.2713.DH23.03.06.0.221229 (24) 15.05.05.2713.DH24.04.07.0.231024 (25) Pending							
est Step:	Testing Procedure:	Expected Outcomes:	Key Milestone Date:	Key Milestone:	Outcome:	Comment(s)			
1	Using production data in an actual live environment or copy of live environment, demonstrate the ability to configure data export configurations for user and practice	Available reporting programs are configurable per user according to license     Practice reporting types can be configurable via the UI	Start test plan execution: May, 2025						
2	Demonstrate the ability to download a QRDA I zip file from a report run for a specific user	QRDA I files are downloaded for only those patients contained within the report and are validated successfully	May, 2025						
3	Demonstrate the ability to limit the set of users who can access the Generate QRDA1 tool for batch export	Logging in as an Entity Admin will allow access to the Generate QRDA I functionality							
4	Confirm users roles that have been denied Generate QRDA I tool access cannot create QRDA I batch exports	Logging in as a non-Entity Admin will not allow access to the Generate QRDA I functionality							
5	Create and validate a QRDA I export for a single patient	Use Cypress to check validity of output file	June, 2025						
6	Create and validate a QRDA I batch export for an entire practice	Export was created and completed successfully	July, 2025						
7	Save the exported QRDA I batch to a preferred location at the time of export.	Saving to a preferred location is allowed     Visually confirming the export after save is performed and successful							
8	Calculate and compile metrics	Prepare RWT results report	Complete test execution: August, 2025						
	Attestation: This Real World Testing plan is complete with all required elements, including measur All information in this plan is up to date and fully addresses the Health IT Developer's		re settings.
